

**CLARK COUNTY DEPARTMENT OF DEVELOPMENT SERVICES
PERMIT APPLICATION REQUIREMENTS
FOR MAJOR STRUCTURES
LETTER OF UNDERSTANDING**

The undersigned hereby acknowledge and understand that the Life Safety Package and the Master Exit Plan(s), when required by Clark County Development Services, are important documents that must be **submitted prior to the initial application** for a building permit. The timely review of these documents is critical to the subsequent review of the architectural, electrical and mechanical plans.

We further understand that the plan review of architectural plans and/or the mechanical plans will be delayed until substantial agreement is reached on:

☐ fire protection aspects of the Life Safety Package

☐ code compliance of the Master Exit Plan and smoke control zones

We understand that the Clark County Building Administrative Code requires that *a principal design professional shall be designated for any project which requires multiple disciplines (i.e., architectural, structural, mechanical, electrical, etc.); and, further, that the principal design professional shall be responsible for the coordination of each aspect of the design package and must be licensed by the State of Nevada to practice as an engineer or architect.*
